

Interested projects at the intersection between climate change, resilience, and gas networks?

Senior Energy Policy Analyst

Energy Networks Australia (ENA) are looking for a new team member to help shape Australia's energy future.

Energy Networks Australia is the peak national body representing Australia's gas distribution and electricity transmission and distribution network businesses. These businesses deliver energy to nearly every household and business in the country. We are a key participant in the development of a better understanding of energy issues across the entire Australian community.

Reporting to the **Head of Renewable Gas**, the **Senior Energy Policy Analyst** works in a small team focused on the role of the renewable gas network in a transforming energy sector.

This is an exciting and challenging position with a salary package that reflects the demands of the role. The position is based in the Melbourne CBD. It would suit someone with 5+ years' experience with a strong interest in the intersection between climate change, resilience and gas networks.

Energy Networks Australia's Gas Committee

ENA's gas committee aims to develop and promote the gas distribution industry through leading public policy debate, information exchange, professional development and industry capacity development, and to do so in a manner which provides value to Energy Networks Australia members and efficiently uses industry resources. The work of the gas committee is delivered via four strategic themes:

- » Renewable gas advocacy: supporting the near-term role of natural gas and a pathway to renewable gas.
- » Demonstrating the role of renewable gases.
- » Supportive policy developments.
- » Technical leadership and innovation in gas networks.

The committee has established different working groups to deliver projects in support of the strategic themes.

What the role involves:

- » Assist the Head of Renewable Gas in delivering the work program on renewable gas for the gas committee.
- » Develop, coordinate and manage the work program of the marketing, technical or policy reference group.

Employment Opportunity | Project Analyst

- » Contribute to the ongoing development of Gas Vision 2050 and a transition pathway to renewable gas.
- » Represent ENA in renewable gas research activities.
- » Use your data analysis, research and advocacy skills to develop fact sheets on priority issues and prepare reports and energy insider articles.
- » Work collaboratively with other gas industry associations to develop a supportive policy environment for renewable gases.
- » Work collaboratively across the energy supply chain to develop a whole of system approach to reach net zero emissions.
- » Monitor renewable gas developments and maintain watching brief of key issues of interest to Energy Networks Australia members;
- » Act as a contact point for industry liaison on a range of related gas policy matters;
- » Contribute to organisational planning; and
- » Other duties as directed to support the activities of Energy Networks Australia.

What's on offer

Salary range \$105,000 - \$120,000 (including superannuation) with potential bonus

While your role will focus on renewable gas networks in a transforming energy sector, you will also work across the organisation. You will gain experience by becoming involved in committees and working groups, with significant exposure to and interaction with senior executives in the industry.

ENA is supportive of further professional development and learning and will help you grow your skills and develop further knowledge of the energy sector.

The right candidate will be offered a salary between \$105,000 to \$120,000 (incl super) depending on experience. In addition to this, an annual performance bonus will be offered.

Ready to apply?

To apply for the above position, **please forward your CV and a short statement** outlining how your experience and skills addresses the following selection criteria:

What we're looking for:

- » Tertiary qualification and/or energy industry experience in energy policy, science, or engineering;
- » Demonstrated ability to research policy issues and collect and analyse data on matters affecting the energy network industry;
- » Strong articulate oral and written communication skills, including the ability to prepare submissions, presentations and reports;
- » Excellent organisational skills to be able to manage own work and make effective decisions;
- » Strong interpersonal skills that enable successful liaison with Energy Networks Australia's members, external regulatory bodies, and other stakeholders;

Employment Opportunity | Project Analyst

- » Experienced with Microsoft office suite, MS Teams and other digital collaboration software;
- » A team player and self-starter that can manage multiple projects at once;

Highly desirable:

- » Qualification or experience in project and contract management;
- » Five to ten years' relevant work experience; and
- » Experience in industry or a member-based association or similar.

Please forward your CV, together with a statement addressing the selection criteria to **Alan Wilson** at alan@alanwilsonconsulting.com.au
