

Employment Opportunity

Exciting role in Australia's most dynamic sector

Head of Distribution

Salary range \$160,000 to \$165,000 (including superannuation) plus bonus

Australia's energy sector is undergoing unprecedented change and this role offers an exciting opportunity to be an integral part of the transformation.

Energy Networks Australia is the peak national body representing all electricity transmission and electricity and gas distribution businesses throughout Australia.

Reporting to the General Manager Networks, the Head of Distribution leads a small team that plays a key role on projects such as Open Energy Networks and the Electricity Network Transformation Roadmap.

The position is based in Melbourne.

For further information about Energy Networks Australia, see our website at <http://www.energynetworks.com.au>

Key Areas of Responsibility:

- » Develop and manage projects and research on electricity sector transformation issues critical to the sector's future, such as Open Energy Networks and the Electricity Network Transformation Roadmap;
- » Lead development and implementation of electricity distribution and network transformation advocacy strategies including liaison with government agencies, market and regulatory bodies, network businesses and other stakeholders;
- » Represent Energy Networks Australia at external events related to electricity distribution;
- » Undertake analysis, liaise with members and prepare submissions other documents on a variety of electricity distribution policy, technical regulation, customer engagement, energy system and market transformation, demand management and research & development issues;
- » Oversee the management of the Asset Management Committee and maintaining positive relationships with representatives of members businesses;
- » Foster industry knowledge sharing, supporting innovation and future network approaches.

Selection Criteria

Essential

1. Tertiary qualifications in electrical engineering, science or other relevant discipline;
2. Strong submission and report writing and editing skills;
3. Knowledge of electricity distribution, asset management and/or energy system transformation issues.
4. An understanding of policy, technical regulation and energy system transformation processes;
5. Strong interpersonal skills that enable successful liaison with external regulatory bodies, Energy Networks Australia's members and other stakeholders; and
6. A team player but also a resourceful self-starter that can manage numerous projects at once.

Desirable

7. Experience in a member-based organisation.
